

**REMARKS:**

**In respect to Claim Rejections - 35 USC 103**

"To establish a prima facie case of obviousness, three basic criteria must be met. First, there must be some suggestion or motivation, either in the references themselves or in the knowledge generally available to one of ordinary skill in the art, to modify the reference or to combine reference teachings. Second, there must be a reasonable expectation of success. Finally, the prior art reference (or references when combined) must teach or suggest all the claim limitations. The teaching or suggestion to make the claimed combination and the reasonable expectation of success must both be found in the prior art, and not based on applicant's disclosure. In re Vaeck, 947 F.2d 488, 20 USPQ2d 1438 (Fed. Cir.1991). See MPEP 2143-2143.03 for decisions pertinent to each of these criteria."

The claim 11 has the following new features:

"said water closet includes a water tank, a toilet bowl located under the water tank, a hole is opened on the back of the toilet bowl and is through with the water passage of the toilet bowl, the hole is connected with the inlet for water closet of the air dividing case through a duct." This new feature guarantees the air bleeding line has most less resistance, therefore, get the best air bleeding result. No cited references teach this new feature. Scott (US 2724840) teaches a hole is opened on the back of the toilet

bowl in Fig. 1, but the hole goes into inside of the toilet rather than the water passage of the toilet bowl. Thereby the hole is easy to be stopped by ordure.

The claim 11 also is different from Prisco in view Fernald. The facts and reasons have described clearly in the Response to Office action dated March 11, 2010.

This invention has been used in a toilet for test. When people use the toilet, no little odor is smelled. The air in the toilet is fresh.

For all of the above reasons, applicant submits that the claims are now in proper form, and that the claims all define patentably over the prior art.

Respectfully submitted,
